## CROSSFIELD DISTRICT CO-OPERATIVE ASSOCIATION U.F.A. LIMITED.

We have just received word and with it a cheque for the THIRD PRIZE in the HAIL Insurance Contest in the three Prairie Provinces. We wish to thank those who placed their applications with us for their hearty co-operation in this Contest and trust that those who have not already insured their crops will not forget there is another Contest on and we ask your support in helping us over the top again in this contest. We also write FIRE Insurance in the Hartford Co. and Car & General.

## Canada Needs More Workers

With present prospects for a bumper crop in Western Canada this year—the brightest since 1914 says the Winnipeg Free Press—with the railway companies all clamoring for thousands of unskilled laborers to be used in construction work, coupled with the announcement that if they are not obtainable hundreds of miles of badly needed branch lines cannot be built; with such a shortage of coal predicted that Western Canada will be forced to rely entirely upon the production from its own mines, and with extensive road-building programs being deferred because the necessary labor cannot be obtained, the question of immigration to this country once again looms up as one of paramount importance.

During the war immigration was practically at a standstill, and, in addition, the energies of all people were diverted to war effort. As a consequence development work and construction programs of all kinds were halted. Now, after an interregnum of six years, there is an enormous amount of work to be done in order to "catch up." There may be a sufficient supply of skilled labor, but there is admittedly a great shortage of unskilled workers. Yet there must be unskilled workers in order that the skilled workers may be kept employed.

No doubt Canada could obtain all the foreign labor it requires if it let down the immigration bars, and threw the doors wide open to all and sundry who cared to come. But Canadians have made up their minds not to repeat the mistakes of the past. The industrious, law-abiding, physically fit and morally clean of all the white races will be welcomed, but no longer will the offscourings of Europe, the mentally deficient, the morally leprous, the physically unclean and weak, be allowed to enter Canada to pollute this country, carry infection to others, and lowered the standard of our people.

The difficulty of securing the right type of immigrants, the only kind we are prepared to receive and welcome, is increased by the fact that while the war-impoorished countries of Europe are willing to allow the misfits and degenerates of their people to emigrate, they are anxious to retain the strong and sound in order to re-establish all the productive enterprises of their own lands. Canada's problem of securing immigrants of the right and only acceptable type is, therefore, no easy one.

According to United States government immigration officials only lack

of ships is keeping back hundreds of thousands of prospective European immigrants from flocking to that country notwithstanding the post-war passport restrictions. The Chicago Tribune declares that "nearly six thousand aliens in many European countries have applied for permission to emigrate to America," and The Literary Digest says that for more than a month immigrants have been arriving in the United States at the rate of ten thousand weekly.

It will be seen, therefore, that notwithstanding the proscriptions now enforced by the United States and Canada on undesirable, and the efforts of European countries to retain those of their own people who are of the desirable immigrant type, workers can be obtained if the government immigration officials bestir themselves. In particular, Canada should strive to secure new settlers and real workers from the British Isles and the United States.

Other countries are active and are offering inducements to the immigrants. We read in a United States paper:

"Numbers of Italians, Spaniards, and French are going to Argentina, where there are many of these nationalities already located. Free land is being given to the newcomers."

"Brazil is not only paying passage for immigrants, but takes care of them on arrival, and transports them free to their destination."

"Chile is inducing immigration by giving one hundred acres and implements to each immigrant."

"New Zealand has arranged with the shipping companies for reduced fares for desirable immigrants." So, Canada will have many competitors in the effort to secure desirable settlers and workers. Yet no student of present day conditions in this country can question the need of additional population in this country. Without it, people now here must carry unduly heavy burdens of taxation, while at the same time going without conveniences and services to which they are entitled and need in order to prosper as they should.

Governments can do much, but every individual can assist by making the newcomer welcome and assisting him in every possible way to "make good," and thereby become a contented citizen, while the lot of the hired man or woman should be made as pleasant as it is in the power of the employer to make it.

Dread of Asthma makes countless thousands miserable. Night after night the attacks return, and even when brief respite is given the mind is still in torment from continual anticipation. Dr. J. D. Kellogg's Asthma Remedy changes all this. Relief comes, and at once, while future attacks are ward off, leaving the afflicted one in a state of peace and happiness he once believed he could never enjoy. Inexpensive and sold almost everywhere.

### Returning to Old Land

While so far no general movement towards the exodus of settlers of central European origin is noticed, the prediction is made that after harvest many Rumanians and others from the Balkan states, will depart from western Canada for their former homes in Europe attracted by the favorable conditions under which they can exchange their Canadian savings for the money of their native land.

A pure white clay found at Pompeii is said to have been used as soap by the Romans.

## Irritated Itching Skins Soothed With Cuticura

Bathe With Cuticura Soap Dry and Apply the Ointment

These super-creamy emollients usually stop itching, clear away pimples, redness and roughness, remove dandruff and scalp irritation and heal red, rough and sore hands. It is used for every-day toilet purposes they do much to prevent such distressing troubles. Nothing better, surer or more economical at any price.

See 25c, Ointment 25c and 50c. Sold throughout the Dominion. Canadian Depot: Limited, 31, Peel St., Montreal. Cuticura Soap always without cost.

### Settlers on Irrigated Land

Five thousand acres of land on the Canadian Land and Irrigation company's tract have been purchased by settlers from the United States and are being put into crop. Water will be available this summer to irrigate the growth.

## WOULD NOT BE WITHOUT BABY'S OWN TABLETS

Once a mother has used Baby's Own Tablets for her little ones she would not be without them. They are the ideal home remedy for the baby; being guaranteed to be absolutely free from opiates or other harmful drugs. They are a gentle but thorough laxative and have been proved of the greatest aid in cases of constipation, indigestion, colic, colds and simple fevers. Concerning them, Mrs. Ernest Gagne, Beaurevoir, Que., writes: "I have used Baby's Own Tablets for constipation and colic and have found them so successful that I would not be without them. They would strongly recommend every mother to keep a box in the house." The Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams Medicine Co., Brockville, Ont.

### Teachers' Household Science Course

The University of Saskatchewan has recommended the establishment during the academic year 1920-21 of a one-year course in household science for teachers in the provincial schools, the course to include both foods and textiles as well as related subjects, including chemistry.

In a wild state the horse lives to be from 35 to 40 years old, while the domestic horse is old at 25 years.

### UNFIT TO LIVE—MUST DIE

The verdict rendered a thousand times where men get sore. Do them to death by Putnam's Corn Extractor; it cures painlessly in 24 hours. Use "Putnam's" if the only vegetable remedy known, price 25c. at all dealers.

### Counting in China

Ten thousand is the largest number in the Chinese language. Therefore all large sums must be stated in multiples of this figure—thus the population of the country is four times 10,000 times 10,000, or 400,000,000.

### Germany Delivers Coal

Also Sends Livestock to France And Belgium

Up to May 30, German deliveries of coal to France under the treaty of Versailles, amounted to 4,686,000 tons it has been officially announced by the reparations committee. Of this total 405,000 tons were given to Luxembourg, Italy received 316,000 tons, and Belgium 98,000 tons in the same period.

Germany up to the end of May, the announcement shows, also had delivered to France 6,547 horses, 40,720 head of cattle, 67,477 sheep and 7,575 goats.

German deliveries to Belgium in this period were 3,316 horses, 43,489 head of cattle, 32,644 sheep, 6,140 goats and 28,339 fowl.

Minard's Liniment Lumberman's Friend.

W. N. U. 1321

## Livestock Often Shrink in Transit

Can be Avoided by Proper Precautions in Shipping

Investigation by the Colorado Agricultural College is beginning to show that shrinkage of live stock when shipped to market can be very greatly reduced. The most important thing is a comfortable car and not much crowding. The next thing is to have the animals well fed and contented when they are loaded and until they are sold at the terminal market. In other words, plenty of feed and more comfortable quarters are most important.

"Some farmers," says R. W. Clark, live stock specialist for that institution, "ship regularly with little or no shrinkage, while others at all times have enormous shrinkage."

There is no more effective vermifuge on the market than Miller's Worm Powders. They will not only clear the stomach and bowels of worms, but will prove a very serviceable medicine for children in regulating the infantile system and maintaining it in a healthy condition. There is nothing in their composition that will injure the most delicate stomach when directions are followed, and they can be given to children in the full assurance that they will utterly destroy all worms.

### Plow Summerfallow Early

Plowing Should be Completed Early In July at the Latest

The chief purposes of the summer-fallow are to store moisture and to kill weeds. Rains falling on freshly-plowed land are more readily absorbed. The water is retained better, partly because the surface can be cultivated to reduce evaporation and also because there is no loss by the transpiration through the leaves of weeds. The latter is an important consideration, as it takes about 500 pounds of water to produce a pound of dry matter in common weeds. Furthermore the rains falling on plowed land help to firm it, and nature thus does for nothing what costs money if done by mechanical means. The plowing should be completed early in July at the latest.

Plowing should be deep, at least seven inches, to provide a good reservoir for moisture. Follow the plow with the harrow, preferably a section attached to the plow, unless there is danger of drifting. In that case pack instead of harrowing. The weeds may be kept down and a mulch of small lumps and granules maintained by using the duckfoot cultivator. The disc pulverizes the soil of a summer-fallow unit and increases the tendency to drift.

Still, a man never seems anxious to marry a woman who isn't afraid of a mouse.

## ONLY TABLETS MARKED

"BAYER" ARE ASPIRIN

Not-Aspirin at All without the "Bayer Cross"

The name "Bayer" on Aspirin is like Sterling on silver. It positively identifies the only genuine Aspirin—the Aspirin prescribed by physicians for over sixteen years and now made in Canada.

Always buy an unbroken package.

There is only one Aspirin—"Bayer"—You must say "Bayer"

Aspirin is the trade mark (registered in Canada) of Bayer Manufacturing of Monastereich, Germany. While it is well known that Bayer is the sole manufacturer, the Tablets of Bayer Company will be stamped with their general trade mark, the "Bayer Cross."

Toronto, Ont.

(Continued.)

"Boy," chided the father sternly, "you mustn't swear. Watson nor Hallibut, nor any other man is that bad. You've let the words get into you until you're fanciful. Read your Bible, and pray more."

"I didn't mean to swear, dad. I've sworn more today than I have for years. I can't stand to think that they men will steal this beautiful spot that is ours now, and cut and cripple it and drive its wild things away."

"Hallibut's saw mill is running nights," said the father thoughtfully. "He made French Joe an offer for his timber through Watson the other day, but I guess it wasn't much. Joe owed him money."

"Well, us Bushwhackers are going to hang together," said Boy. "We own over two thousand acres of the best timber in Ontario. We can keep it by fightin'. If we don't fight—"

He turned and walked toward the door.

"Boy," warned the elder man, "don't you do anything! you'll be sorry for. Just forget all about Watson and Hallibut for a time, 'cause I want to tell how we all come to be in this place we love so much."

"Before you were born, Boy, I lived in the States; ranched it in Arizona. And there was a man down there who as much as stole everything I had in the world. It was because of a woman that he lived to enjoy it all for a time. That woman was his wife, your ma's mother's friend, little Gloskie's mother."

Boy looked up quickly, then dropped his head again.

"That woman was a lot to me and your mother. She was a lady, every inch of her, and educated, too. She taught your ma to be the scholar she is, and she was the kindest-hearted, sweetest woman that could be found in the world. Seems as she run off from a fine home and rich people to marry that man. He was a bad 'un, her man; bad in every way a man can be bad, I guess. He drank and he abused her—"

Big McTavish caught his breath hard.

"Course," he went on, "we might have killed him 'lots of us there would have done more than that for his wife. But you see that woman stuck to him in spite of all he did to make her life hell; so we let him

alone. Your ma worshipped her, or as near it as mortal can worship mortal. Women are not very plentiful on the plains, Boy. When I lost everything to her husband, through his cheatin' me on a deal, and made up my mind to quit ranchin' and strike for some new country, she promised us that after her baby was born she'd come to us, no matter where we might be. You see it had come to such a pass that she simply couldn't live with that man no longer."

The big man paused to light his pipe, and Boy asked:

"Did she come?"

"No. We came direct here to Ontario and settled in this hardwood, and your ma and Granny McTavish. All we had in the world was the clothes we wore and three hundred dollars in money. I took as much land as the money would buy from the Canadian government and started in to cut out a home. You was born soon after we'd settled here. Peeler came and he settled alongside us, and soon after that Dechate came."

"We wrote to the poor little woman an out West and told her the lach-string was out for her whenever she could come. You see I'd built this house by then, and we all felt tolerably happy and well-to-do. We never got an answer to our letter, and the followin' spring I left you and your ma and Granny with the neighbors and struck the back trail for Arizona. I found that her man had been killed in a quarrel with a Mexican, but nobody seemed to know where she and her baby had gone. I hunted high and low for them, but at last had to give it up. I thought maybe she had gone back to the home of her people, 'cause I learned that her husband had left some money behind him. When I got back here I found two babies where I'd left but one. You had a little girl companion sleepin' in your hammock beside you, Boy. Your ma picked her up and put her in my arms and she cried a good deal my ma did, and by and by she showed me a little gold locket that she had found tied about the baby's neck. I opened one of the doors and a tiny picture lay there. Then I knewed at once whose baby it was that God had sent to us, and I knowed, too, that the baby's mother would never come now. An old Injun was there, and he told me how a man in Sandwich had given him money to tell the baby down to us. He couldn't tell us much about the man. We called the youngster 'Injun,' 'cause that was the name the old Injun gave her."

McTavish rose and knocked the ashes from his pipe.

"Now you know how we all come to be here, Boy," he said gently, "and you know why old Injun Noah is so near to us all. He was the man who brought our girl to us."

Boy did not speak, and the father quietly left the room. At the door he turned and looked back. His hand was sitting with his chin in his hands. Outside, the moon was trailing low above the tree-tops, and the owl's hoot sounded far-off and muffled.

### CHAPTER IV.

On that triangular forestland of extreme southwestern Ontario there was a block of hardwood timber, consisting of over two thousand acres. This was known as Bushwhacker's place. On its left lay a beautiful body of water named Rond Eau, and so close to this natural harbor grew the walnut trees that when the night was old the moon cast their shadows far out across the tranquil waters. From the edge of the bay northward and westward the forest swept in valleys and ridges until the lower lands were reached. Then the hard timber gave way to the rugged softwoods of the swales, where the giant basswood, elms, and ash trees gripped the damp earth with tenacious fingers that ran underground, forming a network of fibre, which to this day wears down the plop-points of the fillers of the soil.

Why this upland was called Bushwhacker's Place, or why the people who held possession there were called Bushwhackers, has never been explained. In fact these simple people were not bushwhackers, but hunters, trappers, and fishermen. True, each landowner had cleared a little land, quite sufficient to raise the vegetables necessary for the table and fodder for his sheep, oxen, and pigs during the winter months; but the

common-tendency among the Bushwhackers seemed to be to let the timber stand until it was required for firewood.

All buildings in Bushwhacker's Place were constructed of logs mortised at the ends. The beams, rafters and floors of the houses were split or hewed from the finest grained timber procurable. When the walls were raised to a sufficient height, doors and windows were cut in them, the rafters of the roof were laid, and the wide slabs, split from straight-grained ash blocks, were placed on the roof, overlapping one another so as to shed the rain. Blue clay was dug from the earth to fill in the chinks between the logs. The Bushwhacker's home was roomy, warm and comfortable.

(To be continued.)

Protect the child from the ravages of worms by using Mother Graves' Worm Exterminator. It is a standard remedy, and years of use have enhanced its reputation.

The new telescope of the Mt. Wilson Observatory in California is a quarter of a million times more powerful than the human eye.

## GIRLS! DRAW A MOIST CLOTH THROUGH HAIR

Let "Danderine" save your  
hair and double  
its beauty.

Oh, girls, such an abundance of thick, heavy, inviolable hair, a perfect mass of wavy, silky hair, gloriously fluffy, bright and so easy to manage.

Just moisten a cloth with a little "Danderine" and carefully draw it through your hair, taking one small strand at a time; this magically removes all dirt, excess oil and grease, but your hair is not left brittle, dry, stringy or faded, but charmingly soft, with glossy golden gleams and tender lights. The youthful glints, tints and color are again in your hair.

"Danderine" is a tonic-beautifier. Besides doubling the beauty of the hair at once, it checks dandruff and stops falling hair. Get delightful Danderine for a few cents at any drug or toilet counter and use it as a dressing and invigorator as told on the bottle.

## Mother's Preserving- Time Helpers

IMPERIAL Parowax is Mother's best preserving time helper. It saves her time and labor and guarantees the luscious natural flavor of her preserves—a perfect airtight, safe and sanitary seal.

IMPERIAL  
Parowax

— a pure refined white wax, free from odors, colors and all impurities. No chemicals or acids. The safe method to preserve fruit dainties.

In the laundry it saves time, labor and wear and tear of fine clothes. It loosens the dirt, bleaches the clothes, and adds lustre to ironing.

Sold by good dealers everywhere.

### Chinese Adopting English

An explorer who recently returned from China, states that wherever he went he discovered that the natives were beginning to regard the English people with greater favor than was usual in the past. In Chinese schools for some years past the Arabic numerals have been in use. The figures 0, 1, 2, 3, 4, 5, 6, 7, 8, 9, are infinitely easier to learn than the cumbersome Chinese figures and as both are taught in the schools, it stands to reason that the young John Chinamen are going to favor the easier method. The Braille system is in use in China for the blind, who, owing to the prevalence of leprosy, are common in that country.

A Pill That is Prized.—There have been many pills put upon the market and pressed upon public attention, but none has endured so long or met with so much favor as Farnelle's Vegetable Pills. Widespread use of them has attested their great value, and they need no further advertisement than this. Having firmly established themselves in public esteem, they now rank without a peer in the list of standard vegetable preparations.

### Antique Grain Will Not Grow

The stories about the germination of wheat and other cereals, found wrapped up with ancient Egyptian mummies, are declared to be fictitious by the United States Department of Agriculture. French tests show that grain more than a few years old will not germinate. German tests indicate that when seeds are kept under ideal conditions, wheat, barley and oats may germinate up to eight or ten years, but few if any grains, are alive after twenty years.

## ECZEMA

You are not experienced in its treatment when you use Dr. Chase's Ointment. It relieves at once and gradually heals the skin. Sample box Dr. Chase's Ointment free if you mention this paper and send 20 stamp for postage. See all dealers or Edman, Bates & Co., Limited, Toronto.

The soul of a Piano is in the Action. Insist upon  
**OTTO HIGEL PIANO ACTIONS**

## COUNTER CHECK BOOKS

Provide the only means by which you can keep an absolute accurate check on your sales. The new luxury tax and sales tax makes it necessary to keep such a record. We make sales books suitable for any line of business, with either duplicate or triplicate copies.

### TRIPLICATE BOOKS

There is a heavy demand just now for triplicate books. We make a great variety of triplicate books, both in separate carbon leaf and black back style.

Write us for sample and prices before placing your next order, or ask any of our agents to give you this information.

## Vegetable Parchment Butter Wrappers

We are in the best position of any firm in Canada to fill your order promptly for parchment butter wrappers, either printed or plain. We are large importers of this brand of paper, and have special facilities for printing wrappers in either one or two colors of ink.

### WAXED PAPERS

We also manufacture a complete line of waxed bread and meat wrappers, plain or printed, waxed paper rolls for home use, and waxed papers for all purposes.

Our equipment is the most modern and complete to be found in Canada. Our goods are first class and our service is prompt. Let us prove this to you on your next order for Counter Check Books, Parchment Paper, or Waxed Paper.

CANADA HAS NOW ESTABLISHED  
AIR SERVICE FOR COAST DEFENCE  
MACHINES PATROLLING THE ATLANTIC COAST

**They Will Convoys Ships and Watch for Submarines—Minister  
Of Naval Services Acknowledges Help of the United States  
In Formation of Service**

Hon. C. C. Ballantyne, minister of naval services for Canada, authorizes the following statement on the royal Canadian naval air service, the organization of which was decided upon some weeks ago:

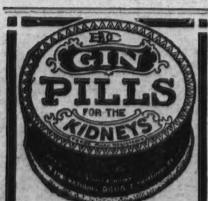

The establishment of an air service for the defence of the Canadian coasts during the war, has been under consideration for some time, but various difficulties, chiefly concerned with the supply of the material, have prevented this being formed before. Early in 1918, however, the government considered that the formation of an air service for coastal defence was of vital and immediate importance to Canada, and as it was felt that this service should be of a naval character and should work in conjunction with the R.C.N., the matter was brought strongly before the notice of the British admiralty.

They were in complete agreement, and sent out an airship officer, Lt. Commander Barron, ex-R.C.N., in March, 1918, to inquire into the general possibilities. The United States government lent the services of an experienced civil engineer, Lieut. Johnson, U.S.N., and acting on the reports of these officers, the admiralty and air minister consented to send out more officers, including one for general organization, assisted by a small staff, together with two experienced seaplane officers for command of the stations. These officers arrived in this country on Dominion Day and have, up to date, been settling details of the preliminary organization, in conjunction with the director of naval services, Admiral Kingsmill.

Preliminary arrangements are now sufficiently advanced to warrant further details of the policy and organization of the service being given to the public. The title of the service will be the Royal Canadian Naval Air Service, with the officers and air men on similar lines to those formerly used in the R.N.A.S.

The uniform for officers will be dark blue serge, cut on military lines, with naval-shaped cap and badges distinctive from the R.C.N., but indicative of the title of the service. The uniform for men will be similar to that formerly in use by the R.N.A.S., and the discipline will be naval. Rates of pay have not yet been completely settled, but will not be less than those in force in the R.A.F.

The thanks of the Canadian government are due to the American government for the latter having so generously consented to supply the personnel for Canada's royal naval air service, until such time as Canadian personnel could be properly trained to take their place. The American government has, as well, rendered every assistance possible to the minister of the naval service by allocating the necessary machines, which include aeroplanes, airships and kite balloons. The presence of hostile submarines on the Atlantic coast, however, necessitated the immediate adoption of measures to cope with them, and the minister of the naval service and his technical officers have lost no time in arranging for adequate air defence, and now make the official announcement that machines are flying on the Atlantic coast, ready to bomb hostile submarines and to

The old-time tested remedy for kidney and bladder trouble. Restored by thousands of men and women throughout Canada. Try them. Sold for 50c. a box and to be had almost anywhere.

Greater Part of Wheat  
Is Grading No. 1  
Reports Indicate Grain Is of Very Quality

In the opinion of competent authorities there will be more wheat of No. 1, Northern grade in Western Canada this year than ever before. Samples of grain which are now being received at the Winnipeg Grain Exchange equal, if they do not surpass, samples sent in during the same period in previous years, and reports from all over the country indicate that the grain is of a very high quality. Most of the grading wheat arriving at terminals are of No. 1.

Experts give as the reason for the excellent grading the exceptionally good weather conditions during the growth of the grain was ripening, and the fact that there have been no heavy rains since cutting began. Several fax samples of high grade wheat, as an announcement of the new days. Most of the fax grown in Manitoba this year was for the British government from seed imported from Siberia.

Eighty Canadians  
Blinded in War  
Some Sent Back to England for

A blinded man to care for the blind is the policy of the department of soldiers' civil re-establishment, as indicated in an announcement at Ottawa by Sir James Loughhead. That Captain E. A. Baker, whose sight was destroyed by a German bullet in France three years ago, has been appointed to the department's vocational staff to care for blind soldiers. Captain Baker, prior to his enlistment, graduated from Queen's as an electrical engineer and served just thirty days in Flanders when his brief period he had won the Military Cross and the Croix de Guerre. He was trained at St. Dunstan's hospital for blinded soldiers in London, England, and as a result has been able to resume his old profession, being employed as "trouble manager" for the Hydro-Electric Power Commission at Toronto.

Altogether, there have been eighty members of the Canadian forces blinded since the beginning of the war, and the war department has decided that all blinded Canadian soldiers shall be trained at St. Dunstan's. Captain Baker intends to once establish an arrangement for the training of blinded Canadians in this institution, before they are returned to Canada. Already a number of blinded soldiers who have returned to Canada have been sent to England for training.

"Made in China" Now  
A pencil factory with a daily output of one hundred gross has been started in Shanghai, China. This started in Shanghai, China. This marks the establishment of a new industry in the country. The product compares favorably with that formerly imported from Germany and Austria, and may in time replace all foreign makes.

Convicted  
"I was awakened in my dugout by a voice getting down: 'Come up out of there you yellow sons of fishes!'" said a captured German officer. "I knew it was the Canadians, and lay stiff. When they followed it with a Mills bomb, I was certain."

The naval minister wishes to reiterate what has been said before, that no applications have been, or will be, entertained from anyone in or on the reserve of the R.A.F., and that all applications from men in military or naval units must be accompanied by the written concurrence of their commanding officer.

The position of former Canadian R.N.A.S. officers now in the R.A.F. who wish to transfer after the war, will receive every consideration, but, as clearly stated, for the time being, no applications can be entertained from officers or men in the R.A.F. It is, therefore, hoped that a ready response will be given by the public to the requirements of the R. C. N. A. S. as stated from time to time in the press.

Origin of "Bolshevik"  
Various explanations have been given of the origin of the name Bolshevik. A Russian doctor gives the true explanation of how the word came to be used. It did not arise out of the present Russian chaos. It seems that in 1903, at the second conference of the Russian Social Democratic party, when the methods employed in regard to the direction of revolutionary activities were under discussion, a difference of opinion arose and vote was taken. There was naturally a majority (bolshevik) and a minority (menchevists). The two groups were thereafter named the "Bolsheviks" and the "Menchevics."

Let in the Sun  
People who keep houses dark for fear of the sun drying their carpets or furniture have no idea of the disease-destroying influence of sunlight and air.

DOOM OF GERMANY WAS SEALED  
WHEN BRITAIN ENTERED THE WAR

OLD ENGLAND'S ARMY AS SOLID AS MONTBLANC

American Writer Boasts for Great Britain—Says She Knows No End to a Struggle Save Victory or Death and Has a Bad Record for an Ambitious Despot to Face

We must not let our delight in the astonishing achievements of our boys, bearing themselves like veterans on the bloodiest battlefields in history and against the most intensively trained troops ever sent into action, blind us to the other 'big things' that have been done in being done in this tremendous tournament of the nations. Even in our appraisal of the great deeds of our allies, we have naturally dwelt chiefly upon the unexpected and the gloriously bizarre—the slaying of the Goliaths by the daring Davids. We have not stopped to comment on the solidity of Mont

Blanc. But it is after all on the solidity of the Mont Blancs that we build. We have seen which country the land was made. What she has done in this war—quietly, unobtrusively and with a steady hand—what she who knew English character, English stamina and English history, imaginative writers have mentioned on some moments at which the blundering bully of Berlin lost his head and his nerve to conquer and enslave the world; but those who take long views of things and recognize the primal fact of the world's history—the destiny of nations since the disintegration of the Roman empire will agree that the doom of Germany was sealed on the day that Britain's councillors wheeled that nation into line with the forces of freedom.

So they entered upon the task of bringing down to paraphrase Kipling—"the Beast that walked like Man." They were under obligations to send some eighty thousand soldiers to help the French. The Kaiser, measuring their honor by his own, thought they would perfunctorily and literally redeem this pledge, and let it go at that. Hence his remark about the "contemptible little army." But the British Empire has sent on land and sea a total of six hundred thousand men. Her empire has added two and a quarter millions more to this. Over eight millions instead of eighty thousands have been in place of one. That is the British way. When we send fifteen million men to have done as well—but not till then.

England was no more a military nation than America when the war began. She learned to fight by fighting—and dying. We are profiting to day by her tragic experiences. Thousands of American lads will come home to us alive and whole because of our blood-brothers from the British Isles have been killed and mutilated and have taught us how to escape. Britain made her armies while France and her own navy held the rap, and then she poured them into France and Flanders by the million to fight back the eruption of Caven men that threatened to submerge civilization.

What the English have done in this war is too recent to need recapitulation. They bravely took over greater and greater sections of the war. They first fought defensive actions with all the dogged courage for which

the British are famous—they they created that early turn in the tide which released the series of allied offensives that finally sent the Germans back to the Hindenburg line—and beyond. They rose to the rank of a full military partner of France—and there is no higher rank.

For all this they paid. There is hardly a home in Great Britain which does not have its unvisited grave in France or Belgium, the very streets on which the permanently maimed do not limp to unaccustomed tasks. And the figures show that the percentage of casualties from the Mother Country exceeds the percentage from the overseas dominions, thus disposing of one of the vilest, meanest, most dastardly lies of the whole Satanic German propaganda which charged that the English were putting their colonial and their allies in the forefront of the battle. Lord Northcliffe estimates their killed alone at 900,000!

England's contributions outside the western front have been worthy of a great nation, even if they stood alone. Her navy has kept the seas free for the commerce and the troop transports of the allied world. It has bottled up the German navy from the sea. Her ships have collected and munitioned the French—brought the iron swift shipment of troops in the firing line during the days of the soul-shaking danger of the last summer; but well over half of them went in British bottoms conveyed by British warships.

Then where have not the British fought? The Suez was in danger. It was the British that protected it. There were German naval stations in the Pacific. The British mopped them up. Russia asked help by way of the Dardanelles. The British tried to give it. Intervention was needed on the Tigris. The British supplied it. The British were in Salonika. The British were in the Adriatic. The British colonial troops freed Africa from the German. British diplomacy steered the Moslem world when the Turkish Sultan and his Sheikh-ul-Islam plotted to divide the world. The British are moving south from Archangel and are at Vladivostok.

Britain financed the allied nations till we came in to share the titanic task. Her industries have clothed, munitioned and supplied them in various vital ways. The Germans say that she has prolonged the war. By that they mean that she has kept up the fighting spirit of the allies and supported their morale. The British is a stout fighter and known to stand to a struggle save victory or death. He never fights a limited liability war—he goes in with his whole soul. The day that British khaki appeared upon the battle fields of France it was decreed that they would be but one of two ends to this conflict—the collapse of the British empire or the final failure of Germany's dream of world conquest—A.R.C., in Philadelphia Public Ledger.

Middle Aged  
Men and Women.

Are Here Told the Best Remedy for Their Troubles.

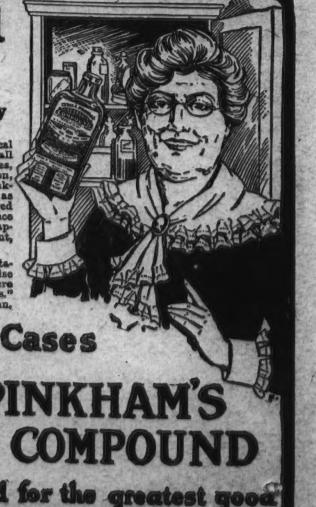

Freemont, O.—"I was passing through the critical period of life, being forty-six years of age and had all the symptoms incident to that change—head aches, nervousness, and was in a general run down condition, so it was hard for me to do my work. Lydia E. Pinkham's Vegetable Compound was recommended to me as the best remedy for my troubles, which it surely proved to be. I feel better and stronger in every way since taking it. The most annoying symptom has disappeared."—Mrs. M. Gouzer, 905 Napoleon St., Freemont, Ohio.

North Haven, Conn.—"Lydia E. Pinkham's Vegetable Compound restored my health after everything else had failed when passing through change of life. There came a time like it to overcome the trying symptoms."—Mrs. Florence Baker, Box 197, North Haven, Conn.

In Such Cases

LYDIA E. PINKHAM'S  
VEGETABLE COMPOUND

has the greatest record for the greatest good.

LYDIA E. PINKHAM MEDICINE CO. LYNN, MASS.

# May Regulate Export Trade of Certain Commodities

Ottawa.—A resolution supplementary to the production of an act to give the government power to regulate the exportation of any commodity produced or manufactured in Canada when circumstances call for such restrictions was introduced in the house of commons by Sir Robert Borden.

The prime minister explained that strong representations had been made that in the interests of the public, it would be necessary to restrict export of such articles as coal, sugar and newsprint. He asked parliament to postpone the usual discussion of the resolution so as to be able to permit the bill to be introduced forthwith. It would be referred to a select committee of parliament which would probably have some revision to make, and then the bill could be debated in the house in committee.

In reply to the objections of Jacques Bureau, Liberal member for Three Rivers, Sir Robert said that he hoped the select committee would find some way of meeting the emergency which had called for the bill, which would take out of the hands of the government the great responsibility involved in carrying it out.

## Name British Objections

Marine Bill Would Prevent Use of Other Than U. S. Ships

Washington.—British objections to the enforcement of the new American merchant marine bill are understood to be based principally on two sections of the measure.

The first prohibits the carrying of merchandise in other than American ships between American ports via a foreign port. This would stop freight carriage between the United States and Alaska over Canadian railroad lines or in Canadian ships, which has grown into a business of magnitude.

The other section directs the president to abrogate all treaties which restrict the right of the United States to impose discriminatory duties upon foreign shipping entering American ports.

## Plan to Keep Men on Farms

Montreal.—R. B. Sauvage, secretary of the United Farmers' Association of Quebec, announces that the institution will meet here to discuss what steps will be necessary for them to take in order to prevent men from deserting the farms and seeking work in the cities and also for the protection of those already engaged in tilling the soil.

## One Great Essential To a Woman's Health Is Her Nerves

Nature intended women to be strong, healthy and happy as the day is long, instead of being sick and wretched. But how can any woman be healthy and happy when the whole nervous system is unstrung. The trouble is they pay more attention to their social and household duties than they do to their health. Is it any wonder then that they become irritable and nervous, have hot flashes, faint and dizzy spells, smothering and sinking spells, become weak and nervous, and everything in life becomes dark and gloomy.

Milburn's Heart and Nerve Pills are the very remedy that nervous, tired-out, weary women need to restore them to the blessings of good health. Mrs. P. H. Ryan, San Point, N.S., writes: "I have been a great sufferer from nerve troubles. I was so weak and nervous I could not sleep at night and my appetite was very poor. I could not walk across the floor without trembling. I began to feel better and fainting spells. When I was on a second box of Milburn's Heart and Nerve Pills I began to feel better and kept on until I had used six boxes, when I felt like a different person. I am never without them in my house and recommend them to all who suffer with their nerves."

Price 50c a box at all dealers or mailed direct on receipt of price by The T. Milburn Co., Limited, Toronto, Ont.

## Cost of Living Still Going Up

Labor Gazette Reports A General Movement of Prices Upward

Ottawa.—The Labor Gazette reports that in prices the general movement continues upward, increases in grain, fodder, livestock, fuel, building materials and furnishings slightly more than offsetting decreases in eggs, milk, hides, textiles and in raw furs.

In retail prices the average cost of a family budget of staple foods in 60 cities was higher, rising to \$16.65 at the middle of May, as compared with \$15.99 in the middle of April, and \$7.42 in May, 1914. The chief increase was in potatoes, which averaged \$6.15 per bag, as compared with \$4.78 in April. Sugar also advanced, averaging 21.7 cents per pound for granulated, as compared with 19.5 in April. There were slight increases in some meats, and in several of the other lines, with decreases in eggs and milk. Coal and coal oil were also up, and rents averaging considerably higher.

## Eulogizes Canada

Manchester Guardian Says Dominion Never More Attractive To The Emigrant

London.—The Manchester Guardian publishes a special Canadian number containing a message from Sir George Foster. He says:

"Canada welcomes every intimation of a renewal of interest and enterprise as displayed in the press and the business community of the Motherland in reference to overseas possibilities of which they have too long been neglectful."

The Guardian, editorially, says that nobody acquainted with the temper and aspect of the Dominion since the war can fail to partake of her optimism, nor, at the same time, fail to be impressed with the welcome moderation and sanity that characterizes it. There is no trace of the excessive booming so dangerous to her reputation in pre-war years, it says.

Continuing, the Guardian says: "On the contrary, both provincial and federal governments together with such responsible bodies as the United Farmers, are showing genuine anxiety to secure that investor and immigrants are given reliable facts and figures, and that the operations of the speculator shall be discouraged. Throughout the Dominion there is manifest an anxiety to be done with machine politics; the rule of the interests and the pull of the lobbyist; never, indeed, in her history, has Canada been a more attractive land to the immigrant with political ideas."

Will Not Trade With Bolsheviks Brussels.—In official quarters demand was made of a report that Belgium would join in the negotiations with Gregory Krasin, Bolshevik minister of trade and commerce, for a resumption of commercial relations with Soviet Russia.

## House to Prorogue Soon

Ottawa.—It was learned that leaders on both side of the house of commons expect prorogation by the end of this week. Many members, however, do not think the house will rise before July 1 at the earliest.

## B. C. Air Board Elected

Vancouver, B.C.—Lieut.-Col. Hon. E. G. Prior, lieutenant-governor, E. W. Peters, and Henry Bell-Ingars were named as members of the British Columbia advisory council of the air board of Canada.

## Coast Lumbermen Want Raise

Prince Rupert, B.C.—All employees of mills and logging camps east of Hazelton, B.C., are on strike for an eight-hour day and \$4 a day with board, as a minimum.

## Turkish Capital to Be Under Allies

Internationalization of the Port of Constantinople Provided in Turkish Treaty

London.—Limited internationalization of the port of Constantinople and its inclusion within the zone of the straits is provided in the provisional terms of the Turkish treaty. This is disclosed by an official summary of the jurisdiction provided for the inter-allied commission of control.

Granted its own flag, budget and separate origin, the commission by the lines of the boundaries fixed for the "zone of the straits," will have authority over a territory larger than some of the smaller nations of Europe. Made almost sovereign in itself, the commission is to be practically independent of the League of Nations, as stipulation is expressly made that should it find liberty of passage of the straits interfered with, it shall take such measures as may be deemed necessary to preserve the freedom of the straits.

The zone includes not only the Bosphorus, Sea of Marmora and the Dardanelles, but also three miles off shore from the mouth of the Dardanelles, and the Bosphorus and the Aegean Islands of Samothrace and Imbros, Tenedos and Lesbos. A land zone is also provided extending from 10 to 17 miles northwest of the Sea of Marmora and 8-28 miles southeast of it.

Its northwestern limit is partly common with the district of Smyrna, 55 miles southeast of the entrance to the Dardanelles. The zone also includes an area on the western side of the Gallipoli peninsula which Turkey concedes to Great Britain, France and Italy for war memorials and cemeteries.

## To Preserve Peace

Organization of New International Body Under Way At The Hague

The Hague.—The conclusion of the jurists invited by the League of Nations to meet in this capacity for the organization of a permanent international court of justice opened its sessions here. The conference was inaugurated by Leonard Bourgeois, president of the French associated societies of Paris.

"The terrible lessons of the war," said the French statesman, "were necessary to make the peoples of the world understand that the basis of peace between nations did not lie in force." He declared that the proposed court would be a really permanent body, not merely a court of arbitration, and that it would render decision from which there would be no appeal. It would be necessary, he added, to have a strong organization to carry out the decisions which would be made in future by the body to be organized.

## MOTHER!

"California Syrup of Figs"  
Child's Best Laxative

Accept "California" Syrup of Figs only—look for the name California on the package, then you are sure your child is having the best and most harmless physic for the little stomach, liver and bowels. Children love its fruit taste. Full directions on each bottle. You must say "California."

W. N. U. 1321

# Would Compel Irish to Take Oath of Allegiance

## Big Profit in Shoes

Shoes Cost \$9.75 and A Toronto Man Pays \$22 A Pair

Ottawa.—In a judgment signed by commissioners W. F. O'Connor and James Murdoch, the Board of Commerce finds the Manhattan Shoe Company of Toronto, "guilty of an offence against the Combines and Fair Prices act in that they sold to Robert Lachapelle a pair of shoes for \$22, bringing a price higher than was reasonable and the board directs the company (K. N. and S. N. Saba) and 'each of them to mark in plain and legible figures, on the sole of each pair of boots, shoes, slippers, pumps and other articles which they now are or may hereafter for the space of twelve months from this date be held for sale, or offered for sale, by them, or either of them, the price to the customer.'"

This case involves the purchase of a pair of shoes from the Manhattan Shoe Company on May 8 for \$22. The shoes cost \$9.25 a pair, at the factory and express, laces and box for the shoes brought up the cost to the Manhattan Shoe company to 975. The shoes being thereupon marked up for sale at \$14 per pair, but were actually sold to the complainant on May 8 for \$22.00.

The board will forward to the attorney general for Ontario a recommendation that the guilty party be prosecuted.

## Co-Operative Stockyards Are Successful

Encouraging Report Submitted By Directors at Meeting in Moose Jaw

Moose Jaw.—That the first four and a half months' operations of the Saskatchewan Co-Operative Stockyards have been completed with entire success, came to light when the first annual meeting of the shareholders was held in the Livestock Exchange building, Moose Jaw. The director's report was most encouraging and showed a comfortable surplus after providing for certain organization and depreciation expenses.

A dividend will not be declared, it was decided, until the company had been in operation for a full year. The meeting was very well attended and the president, J. H. Grayson, and the manager, Edward Evans, were highly complimented on the splendid showing made by the stockyards in such a short time they have been in operation. The retiring directors, Senator Willoughby, W. A. Munna, of Moosejaw, and Trefle Bonneau, of Willow Bunch, were re-elected.

The shareholders expressed themselves as particularly satisfied the large quantities of stock reported as having been received from the neighboring provinces of Alberta and Manitoba, as well as from the eastern and northern sections of the province.

## Many Strikes in May

Ottawa.—A return in the commons shows that in May there were 73 strikes, involving about 12,005 people with a time loss of 145,168 working days. In April there were 44 strikes, 6,629 people idle and 84,009 working days lost.

## Watching the States

London.—Walter Hume Long, first lord of the admiralty, declared in the house of commons that the admiralty was following important developments of the naval program of the United States with the greatest closeness.

## More Divorces Granted

Ottawa.—Six more divorce bills were passed by the private bills committee, and there are still nine more divorce bills to be considered.

London.—The house of commons has tabled proposed amendments to the Irish Home Rule bill, designed to prevent setting up a republican parliament in Ireland, by making it essential that all candidates take the oath of allegiance to Great Britain in order to qualify for office.

The amendments also provide that under certain conditions, the British viceroy of Ireland would be empowered to assume supreme legislative authority.

Sinn Fein sympathizers declared the amendments bore out their prediction that the government had a joker up their sleeve, adding that no Sinn Fein would take the oath of allegiance.

Dublin.—A pitched battle occurred between a group of armed Sinn Feiners and British soldiers at Ballinacorney military camp, near Duncannon, in which many shots were exchanged. The raiders were finally driven off. No report was available as to whether there had been casualties.

Dublin.—The new policy of the British government toward Ireland, soon to be instituted, involves the unconditional release of all Sinn Fein prisoners who have not been convicted, it is learned on good authority.

## Would Select Indian Chiefs

Old System of Hereditary Council May Be Done Away With

Ottawa.—That the government should institute the selective system of securing councillors for Indian bands wherever possible, and that there should be a standing select committee of the house on Indian affairs, were the resolutions brought into the commons by the special committee, to amend the Indian act, whose report was tabled recently.

The committee was of the opinion that administration of the affairs of an Indian community or band by the hereditary council might be detrimental to the best interests and progress of the Indians.

It therefore recommended that wherever such a system now exists, the government should ascertain whether the majority of the male members of the band of the full age of 21 were in favor of the adoption of the selective system of choosing councillors, and if so that the provisions of the Indian act in this regard should be brought into operation as soon as possible.

## Good for Father and Good for Son

MR. C. ROY PRAISES DODD'S KIDNEY PILLS

He States That They Relieved His Son of Bed Wetting and Hiss of Bladder Trouble. Ask Your Neighbor's About Dodd's Kidney Pills.

Thierville Office, Bonaventure Co., Que., June 21st.—(Special).—That Dodd's Kidney Pills have been successfully used by both old and young as a remedy for kidney ills is again shown by the statement of Mr. Clement Roy, of this place.

"I am glad to be able to state," Mr. Roy says, "that Dodd's Kidney Pills relieved my little boy of bed wetting. They also helped my bladder trouble. I cannot say too much in praise of Dodd's Kidney Pills."

Dodd's Kidney Pills are a kidney remedy par excellence. But bladder and urinary troubles come as a result of weak or diseased kidneys. The natural way to treat such trouble is to strengthen or help the kidneys.

Mr. Roy acted on this principle when he used Dodd's Kidney Pills for his own and his son's troubles. The satisfaction he got is voiced by his statement.

If you have not used them yourself, ask your neighbors if Dodd's Kidney Pills are not the remedy for kidney ills.

## Greater Part of Loss from Grain Smut Can be Prevented

Suggestions for treating cereals to control smut are given by W. P. Fraser, who has been carrying on research work for the Dominion government at the University of Saskatchewan at Saskatoon for the past year. Mr. Fraser estimates that the total loss from grain smut in Canada each year exceeds \$20,000,000, and the greater part of this loss could be easily prevented by treating the seed grain in the spring.

The most serious loss in Canada is caused by the loose smut or wheat, the sinking smut or bent of wheat, the loose and covered smut of oats, and the loose and covered smuts of barley.

"All of these smuts," said Mr. Fraser, "except the loose smut of wheat and the loose smut of barley can be easily controlled by seed treatment with a solution of formaldehyde (sometimes sold as formalin). It is the safest and most effective treatment for use on the farm. It is easily applied and the cost is low. The object of the treatment is to kill the smut spores that may be lodged on the seed and thus prevent the smut being carried over to the season's crop. For this reason it is important that the solution reaches every grain of the seed treated."

"The sprinkling method is commonly used for the treatment of the seed grain. One pound of formaldehyde is mixed with forty gallons of water. While a stronger solution may be used, it should not exceed the strength of one pint of formaldehyde to 30 gallons of water. Too strong a solution may seriously injure the germination of the seed. The grain to be treated may be placed in a wagon box or on a clean floor and sprinkled with this solution, using about one gallon to each bushel of grain and shovelling over the grain at the same time, so each grain may become wet. The pile of grain should then be covered with canvas or sacks for two hours or more until the solution has had time to kill the spore of the smut. The grain should then be spread out to dry. Seeding should not be long delayed after treatment."

"Instead of the sprinkling, the dipping method may be used. It is more convenient for small quantities of seed. The grain to be treated is to be placed in coarse sacks through

which the solution can readily pass and is then immersed in a barrel of formaldehyde solution (1 pound formalin to 40 imperial gallons of water for five minutes). The sack should be moved about so that the solution will penetrate thoroughly. The grain is then removed and allowed to drain and then piled in a convenient place and covered as in the sprinkling method.

"In the case of wheat affected with sinking smut it is best to pour the grain in a box or cask of the solution and stir until the smutted kernels have risen to the top. The smut ball should be skimmed off. The solution cannot penetrate into the spoor balls.

"Care must be taken that the treated grain does not become reinfected by the containers that have held smutted grain. The spores or sacks can be killed by soaking them in the solution used for treating the seed and boxes and are sprinkled with the solution.

"Another method of seed treatment has recently been introduced for the treatment of oats. This method of strong solution of formaldehyde is used: one pint of formaldehyde is mixed with a pint of water and the grain is sprayed with this solution while it is being shovelled and then covered for a few hours in the sprinkling method. Only a quart of the solution is used for each 30 bushels of grain. Experiments have shown that this method is safe and effective for oats if properly used, and has the advantage of not wetting the grain. It must be used with care, as too much of the solution will seriously injure the germination of the seed. The solution must be sprayed on the grain—not sprinkled. It is unsafe to use this solution for treating other grains, especially wheat, as it often seriously injures the germination and does not always prevent smut."

"There are some good smut machines on the market. The best of these treat the seed in a satisfactory manner. They can be used profitably on the larger farms. "If the grain is sown when it is still damp and swollen, the seed or drill should be set to make allowance for the swelling. Usually one-half bushel more of barley or wheat and three-quarters of a bushel of oats will be required than of dry grain."

## Going to the Root of Disease

Definite Plan Has Been Framed to Combat Disease in Animals

Wide-extended usefulness in preventing disease on its human side is closely allied with the movement, just started, to control and eventually to up-root disease in Canadian farm stock. Indeed, it may turn out to be the most beneficial part of the plan now under way to combat disease in livestock by the co-ordinated efforts of Dominion and provincial governments, farmers and packers.

The public has, within the last few years, been awakened to the enormous loss of human life, shown to be a greater mortality than that of war, resulting from tubercular disease. Yet the transmission of tuberculosis from farm products to humans has never received from the public a thousandth part of the attention it demands. Physicians have fought the disease in every thinkable way except one. Clinics have been opened, sanatoria have been built; preventive treatment has been widely taught through nursing institutes and even the public schools. None of these, however, has struck so radically at the root of the whole of human disease—the presence of tuberculosis in domestic livestock—as the new movement to eradicate disease from among farm animals. If for this feature of national health and the preservation of human life alone the movement claims the whole of human support of all who have a better, wider and more humanitarian hope for the mass of the Canadian people.

An encouraging beginning has been made. A definite plan of work has been framed to co-ordinate the effort to combat disease in animals. It will be plain to farmers and stockmen that better prices will follow the raising of better stock—better because healthier, more robust animals will feed well and make heavier weights in return for the expenditure of feed and labor.

Much could be done through direct aid by farmers and stockmen themselves. Everyone knows that the "government can't do it all." In South Dakota, where a similar plan is being carried out, it was recognized that one health officer could not inspect a large number of animals in many townships. A committee was therefore appointed by stockmen and farmers among themselves. Each committee-man became a deputy health officer. Community meetings were held. People generally began to talk of better, disease-free cattle, and in all there was a spirit of genuine improvement. Good results are being reported and the work is going vigorously and continuously forward.

Our fight is especially against tuberculosis in cattle. A farmer often wonders why his steers and heifers in spite of good heavy feeding, do not thrive. A tuberculin test would probably reveal the cause. The Dominion Minister of Agriculture, Dr. S. F. Tolmie, in the house of commons on May 14, stated that the intention was to establish small centres of accredited disease-free herds. By this means, the Health of Animals branch hoped to eliminate tuberculosis from Dominion pure-breds. But the work would not be confined to pure-bred stock if present proposals are carried out.

Hog cholera seems to have been more effectively restricted here than in the United States. Latest returns show that only one half of one percent of our hogs are touched with this disease. The cleansing of our live stock also includes the eradication of other diseases. Contagious abortion and sterility have to be overcome, matters of health in animals which will have far-reaching results. When it is remembered that over one billion dollars are invested in Dominion livestock, it will be plain that if a saving of only one percent can be effected by prevention of disease, it represents a value of \$10,000,000 to our farmers.

The committee recently appointed, including representatives of the Government departments, livestock pro-

## Wheat Improvement Encouraged by the Seed Growers' Association

When the Canadian Seed Growers' Association was organized in 1904 it adopted a system of selection suited to the peculiarities of leading farm crops and aiming at their improvement. The wheat crop naturally occupied first attention. At that time the varieties grown commonly throughout the country were more or less mixed. In the West, Red Eye was the leading sort, while certain cross-bred varieties such as Preston were receiving considerable attention owing to their early ripening ability. In Red Eye there were commonly found certain aberrant types believed to be of inferior quality and whose eradication was therefore sought. On the other hand, it was believed that the system of selection adopted by the Association, namely mass-selection, would have a beneficial effect. That such improvement actually took place there is ample evidence. We have today certain strains of Red Eye, for example, which growers fully appreciate the production of wheat naturally increased and became extended to a considerable extent.

As the scientific breeding and selection of wheat became developed at experimental stations in this and other countries, a quicker means of obtaining purity of type came into operation. It was discovered that plants like wheat, which in the main are self-fertilized, will reproduce its characteristics relatively true from generation to generation when a single head is used as the starting point. The so-called "head row" method of selection at experimental stations has therefore become universally practised, with the result that members of the Association have been able to start in with relatively pure strains instead of having to purify them by the slower process of mass-selection. The chief problem of the members of the Association growing seed at present revolves itself largely into that of maintaining the purity of the strain and of propagating the same so as to be able to supply considerable quantities of seed wheat which may go out to the trade in sealed sacks as what is known as "Registered" seed.

While wheat is normally self-fertilized, it is well known that cross-fertilization may occasionally take place. This fact provides an opportunity for the individual grower to make a still further advance by isolating strains possessing qualities of purity in the parent stock. Realizing this, a number of growers are carrying on head-row selection work on their own farms. The importance of encouraging this sort of work can scarcely be estimated. It is a notorious fact that some of our best varieties of wheat have been developed by individual farmers. (Red)

File for example, was isolated and developed by David Fife, of Peterborough county, Ontario. Our leading autumn wheat, namely Dawson's Golden Chaff, was developed by a Mr. Dawson living in Waterloo county, Ontario. The Kitchener wheat, which is becoming quite popular, especially in Southwestern Saskatchewan, where moisture is usually a premium, was produced by Mr. Seager Wheeler, of Rosthern, Saskatchewan, being selected out of the well-known Marquis wheat. A somewhat similar selection, registered under the name of Kitchener-D, has also been selected out of Marquis by Mr. E. J. Dault of Hillesden, Sask. An early strain of Red Eye wheat, which in some parts of the west has given good satisfaction was selected by a Mr. Smith, of Saskatoon, Sask. The Marquis variety, which has been such an enormous boon to Western Canada, was produced at the central experimental farm, Ottawa, is being grown and re-selected by a large number of members of the Association at present. The variety has not reproduced absolutely true, as one might expect in view of its origin, being a cross-bred sort. In the ordinary field of Marquis one can find a greater or lesser number of chaffed forms bearing bearded forms, thick-folled forms, long awns, or velvet chaffed forms and many other which might be mentioned. The ordinary system of mass-selection, having failed to rid the variety of these forms, a number of growers have introduced a head-row system. Probably the best work along this line has been done by Mr. W. Lang, of Indian Head, Sask., who each year conducts a special head row plot with a view to isolating not only the pure strains but superior strains for propagation by the Angus McKay Farm Seed Company, of which he is a member. Formerly much difficulty was experienced by the continued re-appearance of the aberrant types mentioned above. Nowadays, however, thanks to Mr. Lang's painstaking effort, the company is able to propagate on a very large scale, a pure and productive strain.

The value of the work being performed with wheat, especially in Western Canada, for the large number of members now operating, is making itself felt very widely. It is extending rapidly and will probably develop still more rapidly.

With the great care which members have come to devote to the selection of their seed, wheat naturally comes a greater consideration of proper methods of soil cultivation. It has been shown that the proper treatment of the soil has an enormous influence on the success of a given variety and to quite an extent on the date at which it matures. This fact, together with the fact that there are now available certain varieties and strains, will result in wheat being produced successfully under conditions which formerly were considered impracticable for the profitable growing of this great cereal.

## Collected Fifteen Years' Pay

Swede Goes to South Africa to Become Rancher

A man who spoke with a pronounced Swedish accent appeared recently at the U. S. Income tax office in St. Louis and exhibited two new leather cases which contained \$9,000 in traveller's checks. He said that he had just had his only pay day in fifteen years and had heard that an income tax was due. It appears that during the fifteen years he was employed on a ranch in Washington under an agreement with his employer for wages plus board and clothes. During the fifteen years "he went to town" only twice a year and drew no money, he said, because his employer had bought everything for him. When last month he decided to go to South America to become a rancher in his own name his employer accompanied him to town and bought the checks for him. He was told that no tax was due from him.

## Future of Alberta's Dairy Industry

Ranching District Is Gradually Giving Way to the Dairy Farmer

Southern Alberta has never figured much in the dairying industry of the province, though this was thirty years ago the centre of the greatest ranching country in Canada. But with the advent of irrigation and the consequent cultivation of alfalfa, which has proved so successful, a new era is opening out before the dairy man. Alfalfa means cheap milk and plenty of it. Then there is ensilage. The irrigated farm is proving to be especially adapted to growing ensilage, and the development of the sunflower as an ensilage food promises great things. The possibility of growing thirty or forty tons of ensilage to the acre on Southern Alberta's irrigated lands is not long going to escape the notice of the farmer who wants to make dairying the basis of his farming operations. The fact that southern Alberta winters are generally mild adds to the attraction of this district for the dairy man.

## Good Outlook in Manitoba

"Never have I seen crop conditions more hopeful," declares James H. Evans, deputy minister of agriculture for Manitoba, in a report on crop conditions in Central and Southern parts of that province. "There is plenty of moisture; the land is in good shape and the conditions reported to me from every point in the districts visited, without exception, is nearer the ideal than it has been for many years."

## Okanagan Crop Prospects Are Bright

Grain and Fruits Give Promise of A Heavy Yield

Prospects of the biggest crop in the history of the Okanagan valley in British Columbia are held out by Hon. E. D. Barrow, minister of agriculture, who has just returned from that district.

"The season has been late, but the crop prospects are exceptionally good. The growers are optimistic, and a larger acreage will be under cultivation this year," says Mr. Barrow. "Crops of wheat in the northern Okanagan were in splendid condition. In fact, I never saw better. Alfalfa crops are good, too, while in the south the fruit orchards are more plentiful and in stronger bearing this year."

"There has been a little late frost, but it did no serious damage. Where patches of tomatoes were affected, the growers were in time to replant. In the Vernon and Kelowna districts there are from 12,000 to 14,000 acres planted in onions and these, also, are doing remarkably well."

"All through the Okanagan district there is a shortage of labor. At Kelowna, the government labor agent told me he could place 400 men if he could get them. He had one notice calling for 100 men to dig ditches at \$5 a day."

Wherever he went, said the minister of agriculture, he heard the same cry for men. "No man willing to work need be looking for a job today, as long as he is willing to go and work in the country."

## When you feel so "blue" that even the sky looks yellow, you need BEECHAM'S PILLS

A sluggish liver and poor eating habits lead to a daily food poison, which affects the mind as well as the body.

Largest Sale of Any Medicine in the World. Sold everywhere in Canada. In boxes, 25c. and 50c.

Big Elevator Purchase  
One of the biggest deals in grain storage space ever transacted in Winnipeg was consummated recently, when the Leitch McLean Company completed the purchase of seventeen elevators from the Imperial Elevator Company.

Nine thousand five hundred acres of forest are being cut down every day of the year simply for pulp for paper manufacture.

Everybody Knows Dr. Chase's Receipt Book

## And His Family Medicines

MOST people first knew Dr. Chase through his Receipt Book. Its reliability and usefulness made him friends everywhere.

When he put his Nerve Food, Kidney-Liver Pills and other medicines on the market they received a hearty welcome, and their exceptional merit has kept them high in the public esteem.

Take Dr. Chase's Kidney-Liver Pills for example. There is no treatment to be compared to them as a means of regulating the liver, kidneys and bowels and curing constipation, biliousness, kidney disease and indigestion.

One pill a dose, 25c a box at all dealers, or Simmons, Bates & Co., Ltd., Toronto.

**Dr. Chase's Kidney-Liver Pills**

**World's Future Lumber Producer**  
South Africa is now pointed out by a leading authority as one of the world's best fields for growing timber. The work he says, must be done on a large scale by the government, as individuals cannot wait for the returns. Various kinds of pine are declared to be the trees most suitable. The various woods exert such a twisting upon growing trees that straight-grained timber of certain kinds is difficult to obtain. Pine seems to withstand the contorting influence more effectively than other kinds, and very fine, straight-grained timber of this sort is produced.

O. McPherson, Dealer, Undertaker, Furniture Dealer, June 11th, 1919, Minard's Liniment Co., Ltd., Yarmouth, N.S.

Dear Sirs—Since the start of the baseball season we have been hindered with sore muscles, sprained ankles, etc., but just as soon as we started using Minard's Liniment our troubles ended. Every baseball player should keep a bottle of your liniment handy.

Yours truly,  
W. E. McPHERSON,  
Secretary Armstrong High School, Baseball Team.

### Ensilage and Baby Beef

Twenty-eight head of eleven-month old cattle have just been sold from the supply farm of the Canadian Pacific Railway at Strathmore, Alberta. These animals brought an average price of \$109.90 per head. Their average weight was 721 pounds each, so that the price of this baby beef was \$5.25 per hundred pounds.

Ensilage constituted a large proportion of the ration and contributed to the financial success of this feeding enterprise in a season when the price of all foods is high, and when it has been a difficult matter to make money in feeding beef.

### Cataract Cannot be Cured

by LOCAL APPLICATIONS, as they cannot reach the seat of the disease. Cataract is a local disease, greatly influenced by constitutional conditions. HALL'S CATARRH MEDICINE will cure cataract. It is taken internally and acts through the blood on the internal and external structures of the eye. HALL'S CATARRH MEDICINE is composed of some of the best tonic known, combined with some of the best blood purifiers. The perfect operation of this medicine in cataract conditions. CATARRH MEDICINE is what produces the wonderful results in cataract conditions. Druggists & Testimonials free. R. J. Cheney & Co., Props., Toledo, O.

### First Crop of the Season

The Sheep Industry of Western Canada Has Increased Very Remarkably

The gathering of the first crop of the season in western Canada—wool—will soon be in full swing. The lambing season is over and an average gain is reported, and now arrangements are being made for clipping. This year farmers in the three prairie provinces will have more wool than ever for sale and are looking forward to a somewhat higher price than last year, when they sold \$3,695,000 pounds of wool at an average price of about 58 cents a pound.

During recent years the sheep industry in Western Canada has increased remarkably well among small farmers, who have found the country exceedingly well adapted to the needs of their animals, and that they pay immensely. In the province of Saskatchewan it is anticipated that the quantity of wool produced on the smaller farms will be about 100,000 pounds greater than the output from the same source last year. As the number of sheep on the Alberta and Manitoba farms has proportionately increased, a similar gain in the production of wool in these two provinces may also be expected.

### Keep Minard's Liniment in the House.

#### Find Fossilized Fish

Whilst excavating at Berry Creek, Alta., a resident found the fossilized remains of a huge shellfish and those of a big fish. The iridescent, phosphoric hues were still retained in the solid rock formation and a crust of limestone had been broken off to show the true lines of the mollusk and those of the fish.

#### A Prime Dressing For Wounds—

In some factories and workshops carbolic acid is kept for use in cauterizing wounds and cuts sustained by the workmen. Far better to keep on hand a bottle of Dr. Thomas' Electric Oil. It is just as quick in action and does not scar the skin or burn the flesh. There is no other Oil that has its curative qualities.

## DO YOUR EARS RING? HAVE YOU CATARRH?

A buzzing noise in the head is the beginning of chronic Catarrh. If not checked the result is deafness. A simple remedy is to slowly inhale Catarrhobose a few times each day. The soothing vapor of Catarrhobose cures the Catarrhal condition, and hearing improves at once. Head noises, buzzing ears are cured. For Catarrhal deafness, throat, nose and lung Catarrh, there is probably no remedy so efficient. The large one dollar outfit lasts two months and is guaranteed; small size 50c; trial size 25c. Sold everywhere by dealers, or the Catarrhobose Co., Kingston Ont.

### A Self-Supporting Empire

The globe is not growing as much wheat as its inhabitants demand for their daily bread; not as much cotton as they need for their clothes; not as much sugar as will provide their wanted comfort and luxury. We take these three most conspicuous examples of scarcity. It is common to preach economy as a remedy, but when the necessities of life are in question great economies, even if possible, must produce suffering and enfeeblement. The right prescription is increased production. It must begin, of course, at home, but no energy at home can save us unless the empire overseas does its part—London Daily Telegraph.

### Minard's Liniment used by Physicians

Thirty thousand cubic feet of air weighs roughly one ton.

## UTTERLY HELPLESS FROM ST. VITUS DANCE

The Sufferer Restored to Health Through the Use of Dr. Williams' Pink Pills.

St. Vitus Dance is a disease of the nerves brought on by a morbid condition of the blood. It is a common disease with children, and attacks girls more frequently than boys. It is characterized by jerky movements, which are frequently involuntary. The patient becomes pale, languid and often constipated. The limbs and sometimes the whole body jerk spasmodically, and in severe cases the power of speech is affected. Such a child should not be allowed to study, but should be kept quiet, given a nutritious diet, remain out of doors as much as possible, and above all, thing given a course of Dr. Williams' Pink Pills to build up the blood and restore the shattered nervous system. Without this treatment the trouble may become chronic and the patient a life-long sufferer. The value of Dr. Williams' Pink Pills in cases of this kind is shown by the following statement by Mr. Frank J. Scriven, Acton, Ont., who says: "In January, 1917, when I resided at Milton, Ont., my daughter Gertrude, then aged fourteen, had had attack of rheumatic fever, which left as its after effects a severe attack of St. Vitus Dance. For weeks she was confined to her bed, and under the doctor's care. She was entirely helpless, being unable to even hold a spoon to feed herself. At last she lost the power of speech almost entirely and only with great difficulty made herself understood. The twitching of her muscles was so bad it was painful to see her. After a long time and taking a lot of medicine, she seemed to improve. But she did not seem to get along as she ought to. In November, 1917, we removed to Acton, and in January, 1918, she was again confined to her bed with St. Vitus Dance. She was again in a terrible state and quite helpless. She was under a doctor's care, and while there was an improvement, she was still very nervous, did not sleep well and was always tired. In May, 1918, we decided to try Dr. Williams' Pink Pills. She took them regularly according to directions, and after taking several boxes there was a decided improvement. After a further use of the pills she is now as healthy a girl as you would wish to see. She is fat, with a fine, healthy complexion and is strong and lively. The neighbors to whom she is well known remark that she looks like a new girl. Her appearance since taking Dr. Williams' Pink Pills. Both her mother and myself are convinced that the pills have done her a world of good as she is now far healthier than we at one time thought she ever would be." For all trouble due to poor blood and weak nerves there is no other medicine can equal Dr. Williams' Pink Pills. You can get these pills from any dealer in medicine, or by mail, post paid, at 50 cents a box or six boxes for \$2.50 from Dr. Williams Medicine Co., Brockville, Ont.

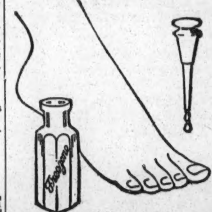

W. N. U. 1321

**Paper Strong as Steel**  
"Astonishingly strong paper caps, capable of withstanding powerful blows, though extremely light in weight, have been invented by a British shipyard employee, and are intended to be worn by workmen whose duties expose them to danger from falling objects. Chemicals are employed to harden the material, without adding to its weight. Several styles have been made, the lightest weighing about seven ounces, and others slightly more. In a recent test a one pound bolt was dropped on one of them from a height of 40 feet, with the result that a barely perceptible dent was made in the paper. The novel head coverings are proof against water and acids, and are non-conductors of electricity.

More than 75,000 children finish their school career each year in New York.

## Lift off Corns!

Doesn't hurt a bit and Freezons costs only a few cents.

With your finger! You can lift off any hard corn, soft corn, or corn because of the hard skin calluses from bottom of feet. A tiny bottle of "Freezons" costs little at any drug store; apply a few drops upon the corn or callus. Instantly it stops hurting, then shortly you lift that bothersome corn or callus right off, root and all, without one bit of pain or soreness. Truly! No humbug!

## Rotating Sheep Pastures

Lambs Especially Fine Grass More Easily Digested

Sheep cannot reasonably be expected to remain healthy and free from parasites peculiar to sheep if they are kept year after year on the same permanent pasture, and especially if the pastures are low and lacking in mineral matters. Sheep deplete soil of needed minerals. In time they fall to find needed supplies and suffer accordingly. That is true of any kind of animal. They also take permanent pastures with the parasites peculiar to their kind.

For best results, therefore, it is imperative that sheep have frequent changes of pasture, that a "fresh bite" be had, that grass may not be too closely bitten, that worms therefore will be less likely to infect them, and that they may have a surer supply of mineral matters as well as organic matters in their feed. Lambs especially must have new seedling each spring. On the sheep-tainted and contaminated pastures they infest themselves with worms. On new grass they escape worms and besides that, find such grass more palatable and easily masticated and digested. The other lesson is that rams, so far as possible, always should come from a "hardier" district than that in which the ewes have been bred. The same line of blood may be maintained but the ram used annually should, if possible, be one raised outside of the immediate district in which the ewes have been produced, and from a district that is better adapted and more healthy for sheep.

### To Make More Room in Building

The highest office structure in the world is not big enough. The towering 54-story Woolworth building in New York is being revamped to make more room. The special U-shaped court which divides the west side of the great edifice into two, tall wings is being closed up as far as the fifth floor, welding the two wings together at their bases to give new space demanded by their tenants.

If one be troubled with corns and warts, he will find in Holloway's Corn Cure an application that will entirely relieve suffering.

the oldest established wholesale Boot and Shoe dealers west of the Great Lakes. Send us your sorting orders. 44 Princess Street, Winnipeg

### MONEY ORDERS

Buy your order of towns supplies with Dominion Express Money Orders. Five dollar costs three cents.

### Big Theatre at Regina

The new theatre of the Trans-Canada Theatres, Ltd., which is to be erected at Regina, will cost \$335,000 and will have a seating capacity of 1,800. The stage will be large enough to accommodate the biggest productions on the road.

### For Colds, Catarrh or Influenza

Do you feel weak and unequal to the work ahead of you? Do you sit slumped a little, or does your nose bother you? Are you pale? Is your blood thin and watery? Better put your body into shape. Build strong!

An old, reliable blood-maker and health tonic made from wild roots and herbs, is Dr. Pierce's Golden Medical Discovery. This "nature remedy" comes in tablet or liquid form. It will build up your body and protect you from disease germs which lurk everywhere. One of the active ingredients of this temporary blood-maker and tonic is wild cherry bark with sassafras, which is so good for the lungs and for coughs; also Oregon grape root, blood root, stoneseed root, Queen's root—all skillfully combined in the Medical Discovery. These roots have a direct action on the stomach, improving digestion and assimilation. They help the blood to be "discovered" aid in blood-making and are best for scrofula. By improving the blood they fortify the body against an attack of grip or cold.

Catch colds before they start, first, as a blood disease with this alterative. Then, in addition, the nose should be washed with Dr. Sage's Catarrh Tablets. Send 10c for trial pkg. of Medical Discovery Tablets or Catarrh Tablets to Dr. Pierce's Laboratories, Brockville, Ont.

All Kinds of Fence Posts

### "FLEXO"

What is there in a name? Nothing, if you don't know what it means.

With "Flexo" in your Automobile Tires you eliminate Blow-outs, Punctures and Leaky Valves, messing about and spoiling your clothes, with Flexo in your old Tires you can wear them down to the last fabric.

Think of it! your wife, daughter or lady friend can drive the car without fear of Tire trouble, when you use "Flexo"

### Local and General

Mr. McCaskill is stepping pretty high these days, the reason evidently being that his stock is increasing rapidly, one cow having produced twin calves a few days ago.

United Sunday School Picnic—Beaver Dam, Inverles and Crossfield Sunday Schools in connection with Union Church will unite this year in one big picnic. It will be held at Mr. W. D. Fraser's, one mile east of Inverles School-house, and five miles south-west of Crossfield. Those having the picnic in hand will include Mr. and Mrs. Jeffery, Mrs. McLees, Mrs. Reed, Miss Ontkes, Mrs. Calhoun, Mr. S. Fleming, Miss Fraser, Mrs. C. Deeks, Miss Walsh, Rev. R. K. Swenerton and others. The picnic will take place on Tuesday, July 13th, starting at 2 p.m., and will be open to everyone, each to bring their supplies for supper with them. Those having cars are asked to kindly use them especially for the benefit of the children.

### I. O. O. F. Memorial Service

The Crossfield Lodge I. O. O. F. No. 42 held their Memorial Service on Sunday last, June 27th. Some 60 members of the local Lodge and Rebekahs were present. The ceremony began with a short service in the Hall presided over by Bro. G. H. Huser acting as N. G. Bro. F. Goodsell V. G. acting as Chaplain. During the service Bro. C. M. S. Thomas P. G. presented a short biographical sketch and eulogy on the late Brother A. R. Thomas P. G. during which he said it was fortunate that we had only lost one Bro. during the past year and that he was pleased to say that his last resting place was being remembered by our Brethren in Calgary in the decoration Ceremony. After the service the Brothers and Sisters proceeded to the cemetery and took part in a beautiful decorating Ceremony. German Plants and flowers were placed on the graves of the late Bros. H. Copley P. G. of Irricana Lodge No. 84, and W. A. Gordon P. G. of the local Lodge. Flowers and Flags were carried by Sister Thompson, Sister Esther Huser, Bros. Brown, Pullan, Whitfield, Becker, C. Stafford, W. Stafford, C. Thompson, V. Thompson, C. Fox and F. Brown. The committees in charge had previously cleaned up the plots and fixed them up generally. Bro. S. Willie as Master of Ceremonies had charge of the arrangements.
